MARTRON POST DIP 10

Section 1. Description

Martron Post Dip 10 is a green water-soluble liquid corrosion inhibitor that contains no nitrite, chromate, or heavy metals especially formulated for use on steel, cast iron and some non-ferrous metals. This compound may be mixed with hot or cold water in any proportion.

Section 2. Characteristic Features

- Excellent rust protection for steel and cast iron.
- Readily water dilutable in any dilution.
- Non-foaming and resistant to microbial degradation.
- Reduced galvanic corrosion between aluminum and steel.
- Dry film which need not be removed prior to painting.
- Effective rust inhibitor for use with both soft and hard waters.

Section 3. Application

Martron Post Dip 10 is recommended for use in surface grinding, barrel and vibratory deburring or rinse waters. It can be added into rinse stage of spray washers also. Use 1% by volume in rinse waters for processing steel; 2% by volume for processing cast iron. Can be added to post-plating rinses where base metal is still exposed.

Section 4. Product Specifications

Form:	Liquid	Specific Gravity:	1.025
Color:	Green	pH Concentrate:	7.50
Type:	Base	2%	7.40
Flash Point:	None	1%	7.30
Weight/Gallon:	8.55 lbs.	0.5%	7.30
